

It is my understanding that the FCC is considering LPFM to take priority over FM translator service, replacing the broadcast of K-Love. I am an avid listener and financial supporter of K-Love. The music and message of this program is inspiring and encouraging, unlike so many other options that are available over the radio. It serves as a wholesome option for my son, our friends, and our community at large. The fact that it exists and functions solely from the financial support of its listeners tells me it meets the needs of hundreds of thousands of listeners across the nation. Please do not take this programming option away from us.
